

Spring Term Project

For your homework project for this half term, we would like you to research and design your own Viking longship! You will need to research what the longships looked like, what they were made from and their design features – then use this research to design your own. You could create a drawing, a labelled diagram or even try to make your own! We cannot wait to see what you design! This project will be due in the Friday 1ST March (this is the first Friday back after half term).
